

Nguyen Ngoc Dung

Fullstack Developer

Tay Ho, Ha Noi • ngocdung002@gmail.com • 0981 153 616 • Portfolio site

Professional Summary

Frontend Developer with 4+ years of experience in React/TypeScript, specializing in real-time systems and complex data visualization (financial dashboards, energy trading platforms). Involved in the full product lifecycle from architecture and performance optimization to production issue resolution across both large enterprise and startup environments.

Experience

SETA International, Frontend Developer – Ha Noi, Vietnam

Sept 2025 – present

- Improved frontend architecture by introducing shared API patterns, reusable components, and code review practices.
- Developed end-to-end Strategy Compare feature, implementing both React frontend and Python/FastAPI backend across 12+ synchronized trading charts.
- Built reusable React component libraries shared across multiple enterprise features.
- Resolved production Webpack ChunkLoadError issues through improved deployment and bundle retention strategies.

ACD Tech, Frontend Developer – Ha Noi, Vietnam

June 2022 – Sept 2025

- Refactored legacy React modules into reusable components, reducing duplicated UI logic and improving maintainability.
- Built real-time financial dashboards with live WebSocket updates and interactive Chart.js visualizations.
- Developed reusable React components adopted across multiple business modules.
- Implemented secure authentication and role-based access control with Google OAuth and MetaMask integration.

ChatX Artificial Intelligence Technology, Full-stack Developer – Ha Noi, Vietnam

June 2024 – Jan 2025

Part-time

- Refactored 6+ core modules of an open-source AI platform, improving UI consistency and maintainability.
- Built AI chatbot features including chat, file upload, model selection, and real-time messaging.
- Implemented full-stack features including authentication, trial access, Stripe payments, and tool calling.
- Managed application deployment, CI/CD, and server monitoring on VPS and Nginx.
- Collaborated with customers to gather feedback, contributing to a successful launch with 300+ trial users in Vietnam and expansion into the Korean market.

Education

BS Electric Power University, BS in Information Technology – Ha Noi, Vietnam

Sept 2020 – June 2025

- Graduated with Distinction
- Awarded an Excellence Scholarship

Key Projects

Gridbeyond: AI-powered energy platform bridging DERs and the electricity grid – React.js, Redux, Webpack, SCSS

TII Forensic: AI chatbot for forensic investigators to analyze digital evidence – Next.js, Tailwind, React Query, React Router

ChatX: AI chatbot automation platform for customer care with company-specific knowledge – Next.js, FastAPI, PostgreSQL, Redis

Skills

Frontend: React.js, Next.js, TypeScript, JavaScript

Backend: Python, FastAPI, Node.js, Nest.js

Database: PostgreSQL, MySQL, SQL

Libraries & State Management: Redux, TanStack Query, React Router, Chart.js, Yup, Axios

Tools & Platforms: Git, Docker, VMware, Azure
